Subject: Path Forward Community Update

THE VILLAGE AT  
**AUGSBURG**  
A National Lutheran Community

In our weekly testing we found one team member who works in independent living has tested positive. This individual has no direct contact with residents whatsoever and we have not been informed if this means we have to return to outbreak status.

Monday we will hold our second COVID-19 vaccination clinic. The individuals who received the first dose last time will receive the second, while others will have the opportunity to get the first. Please remember to wear something that allows your arm to easily be exposed for the shot. Short sleeve shirts with a button or zip up sweater or jacket are preferable. I am happy to report almost all residents have made the choice to be vaccinated, which will certainly help us on a path back to normal. As a reminder, we will continue to follow all visitation and infection control mandates put forth by the Centers for Medicare and Medicaid Services, the Centers for Disease Control and the local and state Health Departments.

In talking with our sister communities and other professional health care partners, we have learned that the side effects are more prominent with the second dose. As a reminder, the vaccine does not give you COVID-19. Most commonly, after the second dose people are experiencing a mild fever, chills, a headache and fatigue. This is a normal part of the vaccination process and the side effects are a sign that your body is building protection against the virus. We will of course, monitor residents closely after they have received the vaccine.

All updates can be found online at [www.thevillageataugsburg.org/pathforward](http://www.thevillageataugsburg.org/pathforward).

I thank you for your continued support during this time.
