Tina Minio, IL Manager
Subject: Change in COVID-19 communication

Since releasing our very first COVID-19 communication in March 2020, we have distributed regular written communication regarding positive COVID-19 results for residents and team members. As we continue our path forward, we are implementing a COVID-19 dashboard to report positive test results and active cases of COVID-19 at The Village at Augsburg. You can find the dashboard on the COVID-19 Updates page located here: <https://www.thevillageataugsburg.org/covid-19-updates/>

Below you will find a screenshot that demonstrates the reporting. Residents' results are reported by service line; all team members across the community are reported together; and contracted service providers, such as our therapy partners and physician groups, are reported together.

THE VILLAGE AT AUGSBURG COVID-19 DASHBOARD

The dashboard is updated when there are changes to the number of cases in the community.
Last updated 09/12/22 11:11 a.m. EDT

	Short-Term Care	Long-Term Care	Assisted Living	Independent Living
Resident active cases of COVID-19	0	0	0	0
Team member active cases of COVID-19 (across all services lines)	0			
Contracted service provider active cases of COVID-19 (across all services lines)	0			

Moving to this method of communication allows us to share our current COVID-19 results in a more efficient and more timely manner. Please visit the page on a regular basis. We will continue to personally notify the POA of Health Center and Assisted Living residents who test positive for COVID-19. As a reminder, we are no longer required to restrict visitation, even if we have active COVID-19 cases. If the Centers for Medicare and Medicaid Services changes this regulation, we will alert you by email.

Thank you for your continued partnership, trust and confidence in The Village at Augsburg.
